

Asbestos • Lead • Mold PCB Ballast/Light Fixtures ABATEMENT SERVICES

ABATEMENT

Asbestos can be found in numerous consumer products, industrial equipment, and building materials. The health risks associated with asbestos are serious and wide-spread.

Lead poisoning continues to occur, and can cause nerve, kidney and brain damage. Children are especially susceptible.

Mold thrives on moisture, forming mold spores and mycotoxins that invade indoor facilities causing allergic responses and diseases.

Let Waco resolve your environmental issues - worry free. From the smallest residential job to multi-faceted industrial mega-projects, Waco has successfully performed tens of thousands of abatement projects. Our workforce is licensed, trained, and seasoned with years of experience.

Since Waco's first abatement project in 1979, we continue to lead the industry in developing economic, efficient and effective methods for controlling environmental asbestos, mold, and lead hazards.

We promise to provide:

- Our Commitment to Excellence
- A Progressive Solutions Approach
- Efficient and Effective Removal
- An Emphasis on Safety

Decontamination Services for Healthier Indoor Air

INDOOR AIR SERVICES

At Waco Inc. we believe that indoor air quality should be taken seriously. We start by successfully identifying potential problems and their sources. Next, we use our abatement training and experience to remove harmful contaminants, significantly improving the quality of the air that you breathe.

Common problem areas for contaminated air include:

- Ducts and HVAC Systems
- Basements and Crawlspace
- Attics
- Carpet and Flooring Material
- Cooling Towers
- Air Plenums
- Refrigerated Areas
- Wall and Ceiling Areas

Our well-trained employees have undergone Respirator Training & Selection, Fit Testing, and Medical Surveillance. Expect experienced workers from a leading company in air quality services. For smaller air ducts, we employ the patented ROTOBRUSH® duct cleaning system - an advanced cleaning method that thoroughly scrubs and vacuums ducts.

We provide:

- Comprehensive Remediation of Harmful Air Pollutants including Asbestos, Lead, Dust, and Mold.
- Duct Cleaning Services
- Source Identification and Management

INDOOR AIR

Chemical Buildup, Dust, Dirt, Grime, Contaminates

INDUSTRIAL CLEANING

CLEANING

Manufacturing plants, process facilities and warehouses have very specific cleaning needs. Daily operations often result in the release and dispersion of byproducts and other contaminants. Greasy films, powdery chemicals, dust, cobwebs, dirt and grime will accumulate on exhaust ducts, vessels, equipment, walkways, and in many unintended areas of your facility.

It has been proven that a clean work area is much less likely to be a fire hazard, and also less likely to support conditions that contribute to accidents and to other negative employee health effects. Protect your facilities and equipment from the corrosive effects of harmful buildups, and make your workplace look sharp and efficient to employees and visitors alike. The cost is minimal, and the benefits are a healthier, more productive staff and a stronger bottom line.

Waco Inc. has extensive experience in cleaning building components, manufacturing environments, and process equipment. We know the equipment, methods and techniques of facility cleanup, and can perform these tasks quickly, efficiently and economically. Let Waco work around your schedule, and you won't have to worry about costly downtime and production delays.

In addition to expert facility cleaning, Waco offers the following services:

- Asbestos Abatement
- Lead Abatement
- Mold Remediation
- Indoor Air Quality Services
- Duct Cleaning
- Insulation Services
- Hazardous Light Fixture Removal and Replacement
- Industrial Painting

We provide:

- Our Commitment to Excellence
- A Progressive Solutions Approach
- Efficient and Effective Performance
- An Emphasis on Safety
